**Key risks:** Past performance is not a guide to future performance. The portfolio is invested in smaller companies - these stocks may be less liquid and the price swings greater than those in, for example, larger companies. Investment in the Fund involves foreign currencies and may be subject to fluctuations in value due to movements in exchange rates. The Fund may invest in emerging markets/soft currencies or in financial derivative instruments, both of which may have the effect of increasing volatility. The Fund holds a concentrated portfolio of stocks, if the price of one of these stocks should move significantly, this may have a notable effect on the value of the portfolio.
