Fund Objectives

The aim of the Fund is to provide income combined with any capital growth.

Investment Horizon

This Fund may not be suitable for investors who plan to withdraw their contribution within three years.

Risk Characteristics

The risk category is calculated using historical performance data and may not be a reliable indicator of the Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to low levels of variation under normal market conditions but, which may still result in losses.

Additional Risk

Counterparty Risk: failure by any counterparty to a transaction (e.g. derivatives) with the Fund to meet its obligations may adversely affect the value of the Fund. The Fund may receive assets from the counterparty to protect against any such adverse effect but there is a risk that the value of such assets at the time of the failure would be insufficient to cover the loss to the Fund.

Derivatives: derivatives can be more volatile than the underlying asset and may result in greater fluctuations to the Fund's value. In the case of derivatives not traded on an exchange they may be subject to additional counterparty and liquidity risk.

Interest Rate Risk: fluctuations in interest rates will change the value of bonds, impacting the value of the Fund. Generally, when interest rates rise, the value of the bonds fall and vice versa. The valuation of bonds will also change according to market perceptions of future movements in interest rates.

Liquidity Risk: some investments may trade infrequently and in small volumes. As a result the Fund manager may not be able to sell at a preferred time or volume or at a price close to the last quoted valuation. The Fund manager may be forced to sell a number of such investments as a result of a large redemption of shares in the Fund. Depending on market conditions, this could lead to a significant drop in the Fund's value and in extreme circumstances lead the Fund to be unable to meet its redemptions.

Credit Risk: the risk that an issuer of bonds will default on its obligations to pay income or repay capital, resulting in a decrease in Fund value. The value of a bond (and, subsequently, the Fund) is also affected by changes in market perceptions of the risk of future default. Investment grade issuers are regarded as less likely to default than issuers of high yield bonds.

Further explanation of the risks associated with an investment in this Fund can be found in the prospectus.

Subscription Redemption

Your orders to buy, sell or transfer shares in the Fund, must be received by the Administrator by 12 noon on any working day to receive that day's Fund price. Also this Fund has another Valuation Point on the last business day of each month and therefore an additional dealing cut off at 4.30pm on that day only. Please note that if your order is placed by an intermediary or Financial Adviser, they may require extra processing time. The Net Asset Value of this Fund is calculated on a daily basis.
