JPM Emerging Markets Income Fund

Class: JPM Emerging Markets Income Fund B - Net Accumulation

Fund overview

ISIN GB00B5TOGN09	Sedol B5TOGN0	Bloomberg JPEMNBA LN	Reuters GB00B5TOGN09.LUF
-----------------------------	-------------------------	--------------------------------	------------------------------------

Investment objective: To provide a portfolio designed to achieve income by investing at least 80% of the Fund's assets in equity securities of emerging markets companies in any economic sector whilst participating in capital growth over the long-term (5-10 years).

Investment approach

- Uses a fundamental, bottom-up stock selection process.
- Uses a high conviction approach to finding the best investment ideas.
- Seeks to balance attractive yield and capital appreciation.

BENCHMARK USES

The Fund is actively managed. The Benchmark is a Performance Comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

Other associated risks *Further risks the Fund is exposed to from its use of the techniques and securities above.*

Currency	Liquidity	Market

Outcomes to the Shareholder *Potential impact of the risks above*

Loss	Volatility	Failure to meet the Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Fund will fluctuate in value.	

General Disclosures

Before investing, obtain and review the current Prospectus, Key Investor Information Document (KIID) and the Key Features Document/Terms & Conditions for this fund which are available in English from JPMorgan Asset Management (UK) Limited or at <https://am.jpmorgan.com>.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. No provider of information presented here, including index and ratings information, is liable for damages or losses of any type arising from use of their information. No warranty of accuracy is given and no liability in respect of any error or omission is accepted.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy

For additional information on the fund's target market please refer to the Prospectus.

Synthetic risk and reward indicator Based on share class volatility for the past 5 years. See Key Investor Information Document (KIID) for details.

Performance information

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees.

Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.
Quoted Price The single price at which all client orders are executed.

Morningstar Analyst Rating™ Morningstar's forward looking fund rating.

Overall Morningstar Rating™ assessment of a fund's past performance, based on both return and risk and shows how similar investments compare with their competitors. Investment decisions should not be based on a high rating alone.

FE Crown rating are quantitative ratings ranging from one to five designed to help investors identify funds which have displayed superior performance in terms of stockpicking, consistency and risk control.

FE Crown Fund Ratings are however purely quantitative and backward looking, and, as such, cannot offer any certainty about the future.

FE Trustnet crown rating as at 31 May 2022.

Rayner Spencer Mills rated fund rating as at 31 May 2022.

Uses both a qualitative and quantitative assessment of the funds. The fund is simply rated or not.

Square Mile Research rating as at 31 May 2022.

A Square Mile Fund Rating denotes a fund that is truly "best in class". Put simply, a Square Mile Fund Rating is only given to a fund that we are prepared to recommend to our clients. Fund managers do not pay for our ratings; they cannot be purchased and are only achieved by the "best-in-class" funds.

The funds we recommend are each assigned a rating – A, AA, AAA or R – reflecting Square Mile's conviction in each fund's ability to deliver on expectations. These simple ratings are the result of exhaustive and detailed qualitative research, backed up by quantitative analysis. "AAA" represents the very highest level of conviction in a fund and its manager, and is a practical demonstration of our belief in the long-term consistent delivery of the fund's objectives.

Our team of investment research analysts also works to identify newer or untested funds or managers that have real potential to deliver their stated objectives. In these circumstances, we are not in a position to award a full fund rating, and therefore these funds are assigned a "Positive Prospects" rating. Over time, if these managers deliver to our expectations and achieve their expected outcome, we

would expect them to progress to A, AA, AAA or R ratings. Not widely used.

Correlation measures the relationship between the movement of the fund and its benchmark. A correlation of 1.00 indicates that the fund perfectly matched its benchmark.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta a measure of a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant.

Annualised volatility (%) an absolute measure of volatility and

measures the extent to which returns vary up and down over a given period. High volatility means that the returns have been more variable over time. The measure is expressed as an annualised value.

Sharpe ratio measures the performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio (IR) measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
