Past performance is not an indicator or a guarantee of future performance. The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details are in the fund's base currency, include the reinvested dividends net of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website. When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

Please refer to the "How We Measure Performance" section for more details about the benchmark.

The W (acc) share class launched on 31.05.2012. Performance data prior to that date is for the A (acc) share class launched on 15.09.1988 which has higher annual charges.

How We Measure Performance

We measure performance and price shares in the Fund in British pounds (GBP).

- We measure performance against the Fund's performance target, the MSCI All Country World (Net Dividends) Index, as it is widely available and reflects investments across global stock markets. The term 'Net Dividends' in the name of the Index means that the Index returns reflect the deduction of withholding taxes.
- The Fund's performance can also be compared against the Investment Association Global Equity sector average, which reflects the performance of the Fund's competitors.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in equity and equity-related securities of companies of any size located in any country. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: foreign currency risk, emerging markets risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Funds.

Glossary

Dividend Yield: The annual dividend received on an equity security as a percentage of the price. For a portfolio, the value represents a weighted average of the stocks it holds. It should not be used as an indication of the income received from this portfolio.

Price to Book: The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds.

Price to Cash Flow: Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds.

Price to Earnings (12-mo Trailing): The share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.
