### Objective and investment policy

The Fund aims to provide a return, from a combination of capital growth and income over the long term.

Performance target: To outperform the MSCI Emerging Markets Index by 2% per annum, before the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in a concentrated portfolio of shares (also known as equities) of companies, of any size, in any industry, in emerging markets. Companies will have their registered office in or do most of their business (directly or through subsidiaries) in emerging markets. 'Emerging markets' are countries in the MSCI Emerging Markets Index, included in the World Bank definition of developing economies, or which are, in the investment manager's opinion, developing. The portfolio may be concentrated in terms of its number of holdings and/or the size of its largest holdings.

The Fund is actively managed with reference to the MSCI Emerging Markets Index, which is broadly representative of the companies in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Global Emerging Markets sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

### Additional information

Please note that as of 1 March 2022, Matthew Culley also manages this fund.

Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies and costs to be paid or represented in currencies other than your home currency will expose you to currency risk. Costs and returns may increase or decrease as a result of currency and exchange rate fluctuations.

## What are the risks specific to this fund?

- The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.
- Shares/Units can lose value rapidly, and typically involve higher risks than bonds or money market instruments. The value of your investment may fall as a result.
- Emerging markets expose the Fund to higher volatility and greater risk of loss than developed markets; they are susceptible to adverse political and economic events, and may be less well regulated with less robust custody and settlement procedures.
- This Fund may have a particularly concentrated portfolio relative to its investment universe or other funds in its sector. An adverse event impacting even a small number of holdings could create significant volatility or losses for the Fund.
- The Fund may use derivatives with the aim of reducing risk or managing the portfolio more efficiently. However this introduces other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- If the Fund holds assets in currencies other than the base currency of the Fund or you invest in a share/unit class of a different currency to the Fund (unless 'hedged'), the value of your investment may be impacted by changes in exchange rates.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

## General risks

- Past performance does not predict future returns.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

## Important information

<sup>1</sup> If index usage refers to a 'target' please read the objective and investment policy section within this document for the definition of the fund's performance target. Fund size at 12pm on last business day of month. All ongoing charges stated are as per latest published report and accounts. Fund charges will impact the value of your investment. In particular, the ongoing charges applicable to each fund will dilute investment performance, particularly over time. For further explanation of charges please visit our Fund Charges page at <http://www.janushenderson.com>.

\* Yields are shown net except for bond funds which are shown gross. The Historical Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions. + Index: The MSCI Emerging Markets Index is a measure of the combined performance of large and medium sized companies from emerging stock markets. It forms the basis of the Fund's performance target and provides a useful comparison against which the Fund's performance can be assessed over time. ++ Peer group benchmark: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Investment into the fund will acquire units/shares of the fund itself and not the underlying assets owned by the fund.
