### Ratings

Morningstar - ★★★

### Objective and investment policy

The Fund aims to provide a sustainable level of income with the potential for capital growth over the long term.

Performance target: To outperform the Markit iBoxx GBP Non-Gilts all maturities Index by 1.25% per annum, before the deduction of charges, over any 5 year period.

The Fund invests at least 80% of its assets in Sterling-denominated bonds of any quality, issued by governments, companies or any other type of issuer.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the Markit iBoxx GBP Non-Gilts all maturities Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index.

As an additional means of assessing the performance of the Fund, the IA Sterling Corporate Bond sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.

### Additional information

The month-end duration of the fund (in years) is shown on the left. Duration measures the sensitivity of a bond fund to interest rate changes; the larger the figure, the more sensitive is the bond fund to a movement in interest rates.

Performance for the share class is calculated at 12pm and performance of the index is calculated as at close of business. Note that any differences among portfolio securities currencies, share class currencies, and your home currency will expose you to currency risk.

### Cumulative Performance in (GBP)

Percentage growth, 28 Feb 2016 to 28 Feb 2021.

Where quartiles are shown, 1st quartile means the share class is ranked in the top 25% of share classes in its sector.

The I Acc share class was launched on 01 August 2012. Performance prior to that date is past performance based on the Acc share class of the same fund, which has a different Ongoing charge AMC included of 1.29%.

**Past performance is not a guide to future performance. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.**

## What are the risks specific to this fund?

- The Fund may invest in contingent convertible bonds (CoCos), which can fall sharply in value if the financial strength of an issuer weakens and a predetermined trigger event causes the bonds to be converted into shares of the issuer or to be partly or wholly written off.
- The Fund could lose money if a counterparty with which it trades becomes unwilling or unable to meet its obligations to the Fund.
- An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.
- When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.
- If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.
- The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.
- Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.
- Some or all of the Annual Management Charge and other costs of the Fund may be taken from capital, which may erode capital or reduce potential for capital growth.

## General risks

- Past performance is not a guide to future performance.
- The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested.
- Tax assumptions and reliefs depend upon an investor's particular circumstances and may be subject to change.

## Important information

^ If index usage refers to a 'target' please read the objective and investment policy section within this document for the definition of the fund's performance target. Fund size at 12pm on last business day of month. Credit rating breakdown source: Composite Moody's, S&P, Bloomberg. Unless otherwise indicated all figures sourced from Morningstar, Datastream, BNP Paribas and Janus Henderson Investors. † 100% of the Annual Management Charge is taken from capital. \* Yields are shown net except for bond funds which are shown gross. The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the mid-market share price of the fund at the date shown. The Underlying Yield reflects the annualised income net of expenses of the fund (calculated in accordance with relevant accounting standards) as a percentage of the mid-market share price of the fund at the date shown. The Distribution and Underlying Yields are based on a snapshot of the portfolio on that day. The yields do not include any preliminary charge and investors may be subject to tax on distributions. The Distribution Yield may be higher than the Underlying Yield. This is because the fund may distribute coupon income. This has the effect of increasing the distributions for the year and constraining the fund's capital performance to an equivalent extent. + Index: The Markit iBoxx Non-Gilts all maturities Index is a measure of the combined performance of investment grade corporate bonds issued in pounds sterling. It forms the basis of the Fund's performance target and provides a useful comparison against which the Fund's performance can be assessed over time. ++ Peer group benchmark: The Investment Association (IA) groups funds with similar geographic and/or investment remit into sectors. The Fund's ranking within the sector (as calculated by a number of data providers) can be a useful performance comparison against other funds with similar aims. Please note: due to rounding the figures in the holdings breakdowns may not add up to 100%. Unless otherwise indicated all figures sourced from Morningstar, Datastream, BNP Paribas and Janus Henderson Investors. Please note the views, opinions and forecasts expressed in this document are based on Janus Henderson Investors research, analysis and house views at the time of publication. Third party data is believed to be reliable, but its completeness and accuracy is not guaranteed. Please read all scheme documents before investing. Before entering into an investment agreement in respect of an investment referred to in this document, you should consult your own professional and/or investment adviser. The value of an investment and the income from it can fall as well as rise and you may not get back the amount originally invested. Tax assumptions and reliefs depend upon an investor's particular circumstances and may change if those circumstances or the law change. If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially than those shown on this document. Nothing in this document is intended to or should be construed as advice. This communication does not constitute an offer or a recommendation to sell or purchase any investment. It does not form part of any contract for the sale or purchase of any investment. Any investment application will be made solely on the basis of the information contained in the Prospectus (including all relevant covering documents), which will contain investment restrictions. This document is intended as a summary only and potential investors must read the prospectus, and where relevant, the key investor information document before investing. We may record telephone calls for our mutual protection, to improve customer service and for regulatory record keeping purposes. Issued by UK by Janus Henderson Investors.
