MAY 2022 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Asset information as at: 31-May-2022. All other data as at 09-Jun-2022.

For Investors in the UK. Investors should read the Key Investor Information Document and Prospectus prior to investing.

FUND OVERVIEW

The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) over the long term (5 consecutive years) which exceeds 3 month GBP LIBOR by 3.5 % (gross of fees). The Fund will invest on a global basis in any or all of the following asset classes: equity securities (e.g. shares), fixed income securities (e.g. bonds), permitted money-market instruments (e.g. debt instruments with short-term maturities), permitted deposits, cash, other funds and derivatives (i.e. investments the prices of which are based on one or more underlying assets). The above-mentioned asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the investment manager's discretion.

GROWTH OF HYPOTHETICAL 10,000 GBP

Unit Class performance displayed in British Pound. Source: BlackRock. Performance is shown on a bid to bid price basis, with net income reinvested, net of fees. **Past performance is not a reliable indicator of current or future performance.**

12 MONTH PERFORMANCE PERIODS

Share Class performance is calculated on a Net Asset Value (NAV) basis, with income reinvested, in British Pound, net of fees. Benchmark performance displayed in GBP.

Key Risks: The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. The fund invests in fixed interest securities such as corporate or government bonds which pay a fixed or variable rate of interest (also known as the 'coupon') and behave similarly to a loan. These securities are therefore exposed to changes in interest rates which will affect the value of any securities held.

Capital at risk. All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.

RATINGS

Key Risks Continued: The Fund utilises derivatives as part of its investment strategy. Compared to a fund which only invests in traditional instruments such as stocks and bonds, derivatives are potentially subject to a higher level of risk and volatility.

SECTOR BREAKDOWN (%)

	Fund	Benchmark	Active
Developed Equity	30.36	0.00	30.36

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.58
MSCI ESG Quality Score - Peer Percentile	45.07%	MSCI ESG % Coverage	92.11%
Fund Lipper Global Classification	Mixed Asset GBP Flexible	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	72.13
Funds in Peer Group	213		

All data is from MSCI ESG Fund Ratings as of **06-May-2022**, based on holdings as of **31-Dec-2021**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of a fund's holdings that have MSCI ESG ratings data.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.
