

Z Accumulation GBP | Data as at 31.01.2021

Fund objectives and investment policy

The fund aims to provide income and capital growth in excess of the FTSE Gilts All Stocks index (after fees have been deducted) over a 3 to 5 year period by investing in bonds issued by governments worldwide. The fund is actively managed and invests at least 95% of its assets in bonds denominated in sterling (or in other currencies and hedged back into sterling) issued by governments, government agencies and supra-nationals worldwide. The fund invests at least 80% of its assets in bonds issued by the UK government. The fund may also invest directly or indirectly in securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds) and money market instruments, and hold cash. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently. The fund may use leverage and take short positions.

Relevant risk as associated with this Fund are shown overleaf and should be carefully considered before making any investment.

Performance over 5 years (%)

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Ratings and accreditation

Please refer to the Important information section for the disclosure. The above are external ratings and the internal ESG accreditation.

Z Accumulation GBP | Data as at 31.01.2021

5 year return of GBP 10,000

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Capital erosion: As a result of fees being charged to capital, the distributable income of the fund may be higher, but there is the potential that performance or capital value may be eroded.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Issuer risk: The fund is permitted to invest more than 35% of its scheme property in transferable securities and money market instruments issued or guaranteed by an EEA State / governments of the following countries: United Kingdom

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Derivatives risk - Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Synthetic risk & reward indicator (SRI)

LOWER RISK Potentially lower reward **HIGHER RISK** Potentially higher reward

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed and may change over time. A fund in the lowest category does not mean a risk-free investment. A fund is in categories 1 to 3 where it can take lower risks in search of potentially lower rewards and its price may rise and fall accordingly. A fund is in categories 4 to 7 where it can take higher risks in search of potentially higher rewards and its price may rise and fall accordingly.

Risk statistics & financial ratios

| | Fund | Target |
|-----------------------------------|------|--------|
| Annual volatility (%) (3y) | 6.0 | 5.8 |
| Effective duration (years) | 12.0 | - |
| Current yield (%) | 0.4 | - |
| Yield to maturity | 0.4 | - |

Benchmark and corporate action information

The fund's performance should be assessed against its target benchmark, being to exceed the FTSE Gilts All Stocks index, and compared against the Investment Association UK Gilts sector average return. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that this benchmark is a suitable comparison for performance purposes given the fund's investment objective.

Important information

The fund is an authorised unit trust. A Key Investor Information Document and Supplementary Information Document are available.
