This **Fund Factsheet** gives you detailed information about a particular fund to help you decide if it's right for you. It's important that you read this together with all your other plan documents before investing in the fund. To provide capital protection with growth at short term interest rates. The fund invests in the short term money markets such as bank deposits and Treasury Bills. Notes: A. The fund does not invest in any asset types where the capital value can fall, such as fixed interest securities. The value of the fund's assets would only fall if a deposit holder or the UK Government were unable to meet their obligations. B. If the interest earned by the fund's assets is insufficient to cover the fund management charge and any additional fund expenses, the unit price will fall.

- The investment quality of each of the permitted instruments must be closely matched with the fund's objective of stability of capital.
- The permitted instruments for this sector are:

- Insured funds that track a recognised cash index, such as the Bank of England base interest rate, can be included.
